THE EUROPEAN CHOICE IN PROFESSIONAL AUDIO WIRING

GOTHAM AUDIO CABLE

“ When we developed the high resolution Brauner Klaus Heyne Edition microphone, an interconnect cable and internal audio conductors of equally high resolution were needed to support the effortless beauty of this mic.

The choice was easy: Gotham's GAC7 and GAC 3 material. These cables are already well known in the high end audio community for superior RF-rejection through expensive Double Reussen Layer shielding.

That Gotham's cables also deliver superior audio without artificial frequency trickery and without the dreaded congestion in the mid band is less well known.

I continually challenge Gotham's GAC7 cable for tube mics and the GAC3 and GAC4 for phantom and line level applications against other, often better known brands. Gotham's premium mic cables still remain the ones to beat.”

Klaus Heyne, German Masterworks
